

CONVENTIONAL PISTOL

more commonly known as

BULLSEYE

Bullseye is a precision shooting sport. The shooting is done standing, unsupported, holding the gun in one hand with the arm extended.

Almost any .22 caliber (Rim Fire “RF”) gun (revolver or semi-auto) will get you started. Specific requirements are outlined in the NRA Rule Book.

But the basics are: open sights or optic sights (red dot) with no magnification. No compensators or laser aiming devices. You never load more than 5 rounds at one time. No magnum ammunition is allowed.

Also there is (Center Fire “CF”) and/or .45 pistol. The center fire must be .32 caliber or larger. Most shooters use the .45 for the center fire stage.

Slow fire may be shot at 50 yards or 25 yards. The timed and rapid strings are shot at 25 yards. Indoor matches are “typically” fired at 50 feet on reduced targets.

Course(s) of Fire

National Match

Course:

30 shots with a possible score of 300

Slow Fire, 10 shots in 10 minutes at 50 yards
